
The Panel recommends

- I. **WHO to establish a new global system for surveillance, based on full transparency by all parties, using state-of-the-art digital tools to connect information centres around the world and including animal and environmental health surveillance, with appropriate protections of people's rights.**
- II. **WHO to be given the explicit authority by the World Health Assembly to publish information about outbreaks with pandemic potential on an immediate basis, without requiring the prior approval of national governments.**
- III. **WHO to be empowered by the World Health Assembly to investigate pathogens with pandemic potential in all countries with short-notice access to relevant sites, provision of samples and standing multi-entry visas for international epidemic experts to outbreak locations.**
- IV. **Future declarations of a PHEIC by the WHO Director-General should be based on the precautionary principle where warranted, as in the case of respiratory infections. PHEIC declarations should be based on clear, objective, and published criteria. The Emergency Committee advising the WHO Director-General must be fully transparent in its membership and working methods. On the same day that a PHEIC is declared, WHO must provide countries with clear guidance on what action should to be taken and by whom to contain the health threat.**
