

#### 4. Establish a new agile system for surveillance, validation and alerts

| Actions  | Main actor      | When     |
|--|-----------------|----------|
| WHO to establish a new global system for surveillance based on full transparency by all parties, using state-of-the-art digital tools to connect information centres around the world and include animal and environmental health surveillance, with appropriate protections of people's rights.   | WHO Secretariat | Q4 2021  |
| WHO to be given the explicit authority by the World Health Assembly to publish information about outbreaks with pandemic potential on an immediate basis without requiring the prior approval of national governments.   | WHA decision    | May 2021 |
| WHO to be empowered by the World Health Assembly to investigate pathogens with pandemic potential in all countries with short-notice access to relevant sites, provision of samples, and standing multi-entry visas for international epidemic experts to outbreak locations.  | WHA decision    | May 2021 |
| Future declarations of a PHEIC by the WHO Director-General should be based on the precautionary principle, where warranted, as in the case of respiratory infections. PHEIC declarations should be based on clear, objective and published criteria. The Emergency Committee advising the WHO Director-General must be fully transparent in its membership and working methods. On the same day a PHEIC is declared, WHO must provide countries with clear guidance on what action should be taken and by whom to contain the health threat. | WHA decision    | May 2022 |
